Most people do not realize the alarm ing increase and remarkable prevalency of kidney disease. While kidney disorders are among the most common diseases that prevail, they are almost the last recognized by patients, who usually content themselves with doctoring the effects, while the original disease constantly undermines the system.

A Trial Will Convince Anyone.

much sickness and suffering and when Thousands of people have testified that the mild and immediate effect of Swamp-Root, the great kidney, liver and bladder remedy, is soon realized and that its stands the highest for its remarkable results in the most distressing cases.

Symptoms of Kidney Trouble. Symptoms of Kidney Trouble.

Swamp-Root is not recommended for everything but if you suffer from annoying bladder troubles, frequently passing water night and day, smarting or irritation in passing, brick-dust or sediment, headache, backache, lame back, dizziness, poor digestion, sleeplessness, nervousness, heart disturbance due to bad kidney trouble, skin eruptions from bad blood, neuralgia, rheumatism, lumbago, bloating, irritability, worn-out feeling, lack of ambition, may be loss of flesh or sallow complexion, kidney trouble in its worst form may be stealing upon you.

Swamp-Root is Pleasant to Take. If you are already convinced that Swamp-Root is what you need, you can purchase the regular fifty-cent and one-dollar size bottles at all drug stores.

eprotal NOTE—You may obtain a sample size bottle of Swamp-Root by enclosing ten cents to Dr. Kilmer & Co., Ringhamton, N. Y. This gives you the opportunity to prove the remarkable merit of this medicine. They will also send you a back of valuable information, containing many of the thousands of grateful letters received from men and women who say they found Swamp-Root to be just the remedy needed in kidney, liver and bladder troubles. The value and vaccess of Swamp-Root are see wall known that our readers are advised to send for a sample size bettle. Address Dr. Klimer & Co., Ringhamton, N. Y. When writing be more and matter this pages.

FEEDING THE WINTER LAMBS

Results Given Herewith of Interesting Tests Made at the Ohio Experiment Station.

In tests at the Ohio station two lots of 12 Delaine ewes each, with their October or November lambs from a Southdown ram, as nearly alike as possible with regard to age, weight, conformation and breeding. were fed for 62 days, beginning December 1, as follows: Lot 1, corn and oil meal 4:1, alfalfa and silage; lot 2, corn, oats, bran and oil meal 5:2:2:1. alfalfa and silage. The nutritive ratio of the two rations was approximately the same. The hay and silage were fed ad libitum and approximately the same amount of grain was fed, it be-

ing all that they would consume. The lambs were fed alike, receiving corn and alfalfa. The ewes of lot 1 made an average daily gain per head of 0.095 pounds; those of lot 2, 0.129 pounds; the lambs of lot 1, 0.441 pounds, and lot 2, 0.411 pounds. The cost of feed per pound of gain made by the lambs was 7.1 and 7.5 cents respectively. No appreciable differences in degree of finish from the two rations were noted. Both lots produced prime hothouse lambs.

Two lots of 11 cwes each, with their lambs, were fed for 95 days, beginning December 24, the same ration as in the above experiment, except that during the last five weeks clover hay was substituted for the alfalfa. As And Build Up The System

The cost of feed per pound of gain made by the lambs was for lot 1, 8.7 cents, and for lot 2, 10.1

WINTER CARE OF THE SHEEP

Fleece of Good Quality Cannot Be Secured From Half-Starved Animal -Give Succulent Food.

If the sheep are neglected and allowed to run down in flesh when the winter sets in the fleece will be injured in both weight and quality.

A fleece of good quality cannot be grown on a poor half-starved sheep. If the ewes are allowed to get poor during the winter the chances are that the lambs will be weak and will perish for lack of nourishment and from cold, while the lambs from a wellcared for ewe will be much abler to stand the cold if they should happen to be dropped when the weather is

The dams will have more milk for their young, too, if they are well cared

Sheep need some succulent food during the winter. They should have or clover hay, and, above all, they should have a ration rich in both protein and mineral matter.

Pasture Grasses and Forage Crops Make Healthy, Vigorous Hogs-Some Grain Is Necessary.

Many now realize the fact that the growing of pasture grasses and forage crops that make healthy, vigorous hogs of good quality is the basic factor in successful pork production. They are raising hogs at a big profit.

Of course those who are successful realize the fact that a certain amount of grain feed is needed to grow hogs with a greater profit, but they use this grain only as a supplement to the feeds harvested by the hogs in the pastures and fields.

Cost of Mutton. A pound of mutton can be produced at less cost than any other kind of meat.

Charcoal is Beneficial. Do not forget that during the winter, as during the summer, a little crushed coal or charcoal is highly beneficial for keeping the pig in health. If anyone should doubt this,

coal in the pig pen and see how rapidly he disposes of them. Good Remedy for Lice. Kerosene oil rubbed on a hog's back is good for lice. Do not have it too strong or rub it too bard or it

Decidedly Encouraging From Every Standpoint.

Speaking of conditions generally in Canada, the most encouraging feature of the year, from a trade and financial standpoint, has been the bountiful harvest of the Northwest, where a greatly increased area under cultiva-tion has given the highest average yield in the history of the country. It is estimated that the grain crop of Manitoba, Saskatchewan and Alberta has a market value to the producers of approximately four hundred million dollars, in the use of which we may anticipate not only the liquidation of much indebtedness, but the stimulation of current trade. The annual reports of the various

banks throughout Canada are now being published. They savor of optimism all the way through, and, contrary to what might be generally expected in war times, business is good everywhere. The General Manager of the Bank of

Montreal at the recent annual meeting said: "The position of Canada is a highly favored one, with an assured future of growth, development and general prosperity."

In the same report it is said that the Canadian West "has recovered to a marked extent from the economic dislocation of a year ago." The season's wheat and other cereal

crops have exceeded all previous records in quantity and quality, and, despite the enormous yield, prices have been uncommonly well maintained. It would be difficult to exaggerate the importance of these results to the Prairie Provinces-and the Dominion at large.

The prosperity of those engaged in mixed farming and ranching is most male birds must be allowed with encouraging.

The flour mills in Manitoba, Sazkatchewan and Alberta are busy and cent of meat scrap is necessary, or, are doing well. Their combined daily capacity is about 27,000 barrels.

The large advances of the Dominion Government to farmers in certain districts, principally in the form of seed, stuff like cabbage, with grit, lime. were made very opportunely and have charcoal, and plenty of pure water at been amply justified by the very large crop yield in those districts.

Business ir many important lines is good and should continue to improve as returns from grain yet to be marketed are received.

The general business outlook has been transformed by the large crop. The returns of the gross earnings of Canadian railroads for November show those of the Canadian Pacific increased \$1,796,000 or 78 per cent for the last nine days of the month. Compared with same month year ago, increase no less than \$5,291,000 or 67.6 per cent against a 45 per cent gain in October, and a decrease of 412 per cent in September.

H. V. Meredith, of the Bank of Mont-Montreal, declared that the most enof lot 1, 0.377 pounds of lot 2, 0.333 in history of the country. He esti- no draft strikes the inmates. mated the grain crop of the three provinces at a value of over \$400,000. 000, and said that such remarkable reshores, when the world is again at natural environment when housed in balance in our foreign trade is a factor of supreme importance at the present time.

It is the general opinion in the East that the 1915 grain crop in the Prairie Provinces not only put the whole Dominion in a sounder trade and financial standing, but that it will also resun in a big increase in immigration to the West of agricultural settlers. who will include capitalized farmers from Europe and the United States as well as homesteaders.-Advertisement.

ENCOURAGE PULLETS TO LAY

Housed Together, Well Fed, With Plenty of Green Stuff and Fresh Water They Will Lay Eggs.

If you let the pullets run with the flock and feed them in an irregular way they will certainly take their time in beginning to lay. When the combs are showing up red and mature is the time to be getting the pullets in a house to themselves, with a good laying ration, and they will lay weeks earlier and more steadily after beginning if kept to themselves and not allowed beyond a small inclosure. No

Famous Columbian Rock.

them. A dry mash with a reasonable per mash made up crumbly will help a speedy start. Housed together, fed well, with plenty of succulent green hand, and nothing else to think of but making themselves useful, they will produce the eggs.

The reason the pullets on the farm lay so few eggs in fall and winter, and put of regular laying until often late spring, is due to letting them run with the flock and giving no extra feeding or warm room to themselves. This last is the only way to get winter eggs from the early spring pullets.

BEST HOUSES FOR CHICKENS

One Subject on Which Successful Poultrymen Agree-Fresh Air and Sunshine Are Essential.

The most successful poultrymen we real, in a recent address delivered at have today differ point blank on almost any subject, if we except that of couraging feature from a trade and housing. On this point they will agree. finance standpoint had been the boun- Any kind of house will answer the tiful harvest of the Northwest, where purpose, so long as it provides adethe greatly increased area under culti- quate room, sunshine and an abunvation had given the highest average dance of fresh air so admitted that

Given a cool, dry house, your fowls are reasonably safe; a warm, damp house and you have a roup producer sults would have the effect of attract. Repeated experiments have proved ing the tide of immigration to our that fowls are more nearly in their peace. The restoration of a favorable dry, cold, fresh-air houses, than when in artificially heated ones. The egg production is much better in the former kind. In the matter of hatching and brooding, it has been found that the eggs hatch much better, and the chicks are stronger, from stock housed in the open-air houses. Many times when the chicks do not "escape the shell." the trouble is laid to the incubator, when, as a matter of fact, it was caused by the breeders becoming short in vim and vigor from wrong winter care.

KEEP POULTRY HOUSE CLEAN

sens Chance of Disease-Provide Proper Dust Bath for Hens.

Droppings should be removed daily. for cleanliness in the poultry house promotes comfort and lessens the chance of disease.

Poultry houses, however simple. should be both warm in winter and well lighted. The windows should also be provided with iron netting, so the sash may be raised to admit air in summer, and also mild weather in

winter. One portion should be half dark, for original the laying and sitting hens, and a proper dust bath should be provided. If lice make their appearance, fumigate thoroughly and after cleansing whitewash with lime to which a little carbolic acid is added.

Change Cockerels Yearly.

Change cockerels every year, or at least every second year. And a male from a flock known for record layers will be no extravagance. If allowed free range one male will care for three dozen hens, but keep layers feet off snow and ice.

Good Sour Milk Ration. A good sour milk ration: Corn, four

parts; wheat, two parts; bran middlings, one part; corn meal, one part; sour milk, separately. Give 100 hens 2½ gallons of milk and from 19 to 25 pounds of other food a day. Good Fowls to Keep.

Choose those fowls having full bodies, good carriage, wide backs, short legs, full breasts and well-formed combs. this last feature being imperative in the male.

Hurry Pullets to Laying. To hurry the pullets on to laying rather more of the heavier feeds may be used. It is not well to crowd them too hard, however. Nature likes to take her own way.

HRY How to avoid Operations

These Three Women Tell How They Escaped the Dreadful Ordeal of Surgical Operations.

Hospitals are great and necessary institutions, but they should be the last resort for women who suffer with ills peculiar to their sex. Many letters on file in the Pinkham Laboratory at Lynn, Mass., prove that a great number of women after they have been recommended to submit to an operation have been made well by Lydia E. Pinkham's Vegetable Compound. Here are three such letters. All sick women should read them.

Marinette, Wis.—"I went to the doctor and he told me I must have an operation for a female trouble, and I hated to have it done as I had been married only a short time. I would have terrible pains and my hands and feet were cold all the time. I took Lydia E. Pinkham's Vegetable Compound and was cured, and I feel better in every way. I give you recomposion to publish my pame. way. I give you permission to publish my name because I am so thankful that I feel well again." -Mrs. FRED BEHNEF, Marinette, Wis.

Detroit, Mich.—"When I first took Lydia E. Pinkham's Vegetable Compound I was so run down said I would have to undergo an operation. I could hardly walk without help so when I read about the Vegetable Compound and what it had done for others I thought I would try it. I got a bottle of Lydia E. Pinkham's Vegetable Compound and a package of Lydia E. Pinkham's Sanative Wash and used them according to directions. They helped me and today I am able to do all my work and I am well."—Mrs. Thos. Dwyen, 389 Milwaukee Ave., East, Detroit, Mich.

Believue, Pa.-"I suffered more than tongue can tell with terrible Bellevue, Pa.—"I suffered more than tongue can tell with terrible bearing down pains and inflammation. I tried several doctors and they all told me the same story, that I never could get well without an operation and I just dreaded the thought of that. I also tried a good many other medicines that were recommended to me and none of them helped me until a friend advised me to give Lydia E. Pinkham's Vegetable Compound a trial. The first bettle helped, I kept taking it and now I don't know what it is to be sick any more and I am picking up in weight. I am 20 years old and weigh 145 pounds. It will be the greatest pleasure to me if I can have the opportunity to recommend it to any other suffering woman."—Miss IRENE ERRELIGIES. 1923 Manhattan St., North Side, Bellevue, Pa. FROELICHER, 1923 Manhattan St., North Side, Bellevue, Pa.

If you would like special advice write to Lydia E. Pinkham Med. Co. (confidential). Lynn, Mass. Your letter will be opened, road and answered by a woman and held in strict confidence.
